DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The declaration acknowledges the duty to disclose information under 37 CFR 1.56(a), but does not acknowledge the duty under 37 CFR 1.56(e) which relates to the CIP application.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of copending Application No. 10/604,075. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to

one of ordinary skill in the art at the time of the invention to use the door of 10/604,075 on a vehicle with a cargo box and a plurality of road wheels as taught by paragraph 0004 of Application 10/604,075 (wheels and a cargo box are inherent to large pickup trucks with a tailgate).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

4. Claim 17 is allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The primary reason for the allowance of the claims in this application is that the prior art of record does not disclose or suggest an automotive closure panel including a full floating torsion bar having a first end rotationally grounded within the interior space of the door and a second engaged with and rotationally locked with the second bearing insert wherein the second bearing insert is engaged with the second pivot post such that the pivot post and the second bearing insert are rotationally locked. Westerdale et al. disclose an automotive tailgate with a full floating torsion bar. However, Westerdale et al. do not disclose a second pivot post or that the second end of the full floating torsion bar is rotationally locked with the second bearing insert.
